GREATER MANCHESTER TRANSPORTATION UNIT

SEMMMS Footpath Monitoring Report

GMTU Report 1621 July 2010

Summary

This report is intended to provide an analysis of the current usage of footpaths that would cross, or be affected by, the planned extensions to the A555 (Manchester Airport Eastern Link Road) as part of the South East Manchester Multi Modal Scheme.

The majority of people using the footpaths were adult pedestrians. The number of people using each footpath varied greatly, with half the people counted in the eastern end of the planned scheme at Site 4 and a third of the people using the footpaths at the western end at Site 13B. To the east, recreational, dog walking and shopping were most popular reasons for using the footpaths. At the western end, going to work, convenience and recreational use were the main reasons given for using the footpaths. A quarter of people interviewed use the footpaths daily and 79% use them at least once a week.

1. Introduction

- 1.1 The South East Manchester Multi Modal Scheme (SEMMMS) aims to improve the road network in South East Manchester. This part of the scheme involves extending the A555 Manchester Airport Eastern Link Road to link Manchester Airport with the A6 between Hazel Grove and High Lane. The A555 currently runs from Handforth to Bramhall and would form the middle section of the proposed route.
- 1.2 As the planned extensions would run through countryside, a number of public footpaths and 'Rights of Way' will be severed. GMTU were therefore commissioned to undertake surveys to identify the number of people likely to be affected by this so that the need (or otherwise) for action to mitigate any severance could be identified.
- 1.3 Counts of anyone using the footpaths were recorded by category - pedestrians, horse riders, cyclists & mobility impaired (buggies, mobility scooters/wheelchairs), for both adults and children.
- 1.4 In order to obtain accurate data for an average day, surveys were undertaken on 1 weekday, 1 Saturday and 1 Sunday. The surveys were carried out in June and early July, finishing before the school holidays. Particular care was taken to ensure that count dates did not clash with any local events which may have impacted on the reliability of the data.
- 1.5 Surveys were carried out continuously from 0700 to 2100. The surveys were all carried out manually operating two shifts per day, the first shift from 0700 to 1400 and the second from 1400 to 2100.
- 1.6 The majority of counts were link counts. However, where site locations were at junctions, turning counts were carried out. For analysis purposes, the sites were split into two groups. Sites 1 to 10 are located to the east of the existing section of road (A555 Manchester Airport Eastern Link Road) and sites 11-16 lie to the west.
- 1.7 In order to obtain additional information, interviews were also carried out asking the following questions:
 - Where are you travelling from?
 - Where are you travelling to?
 - Why are you using the footpath?
 - How often do you use the footpath?

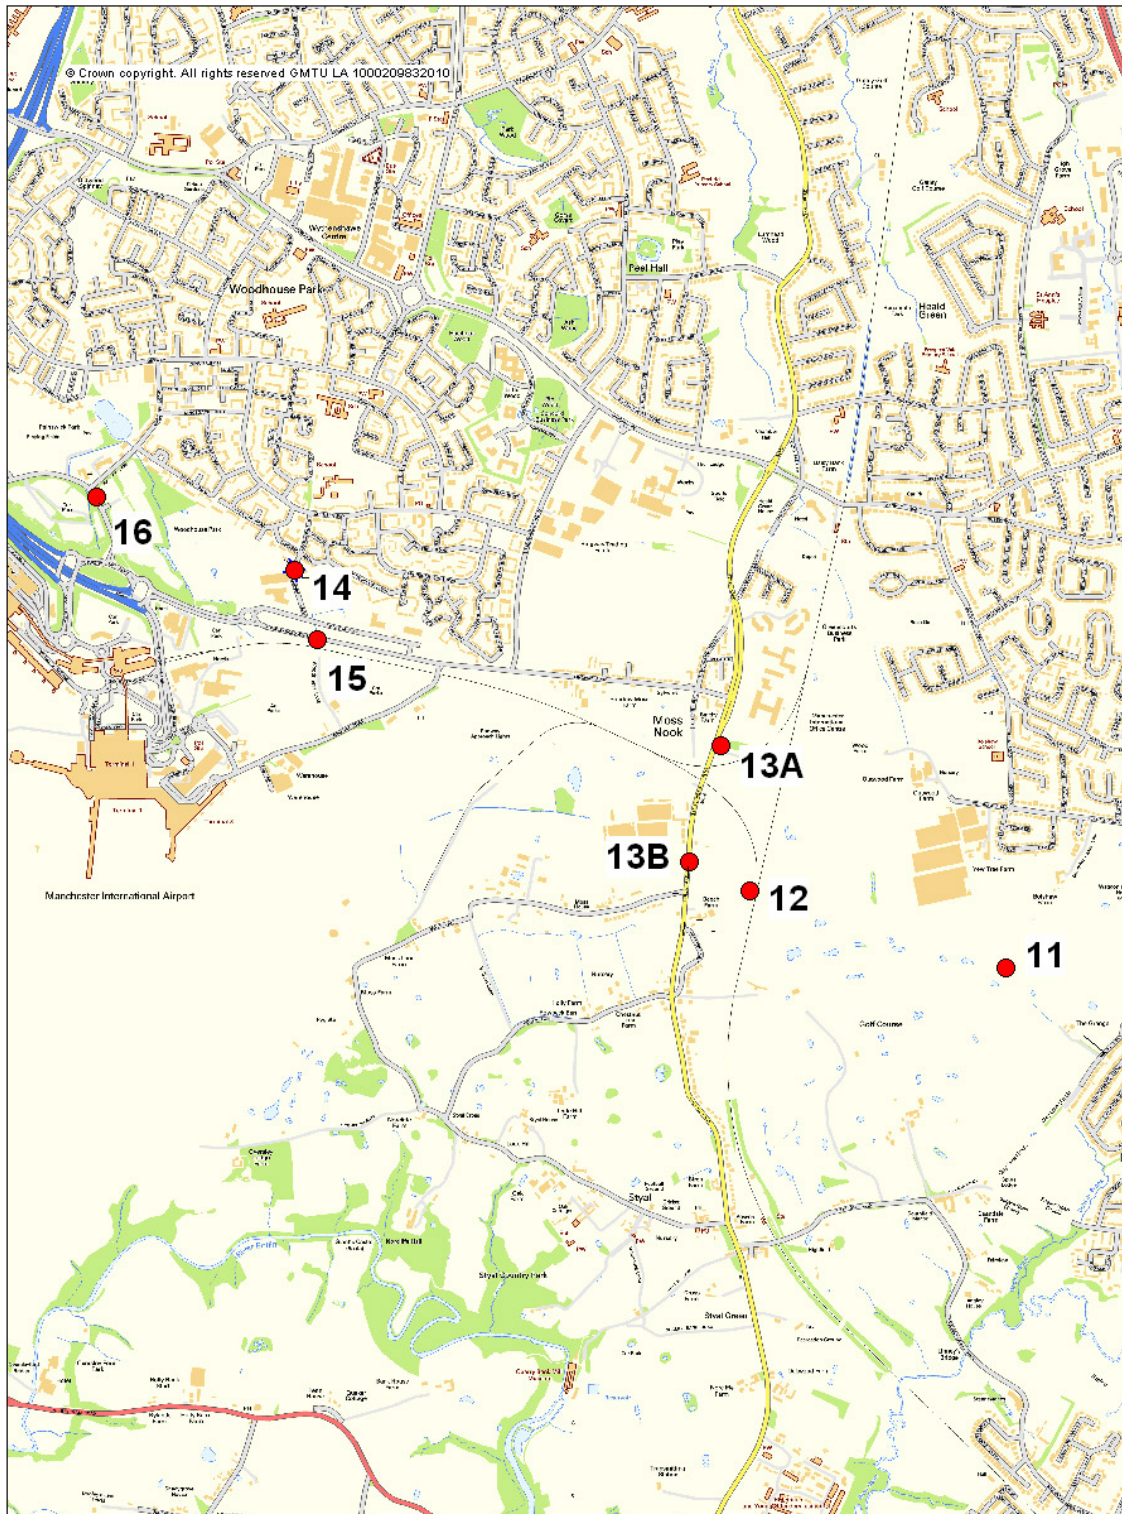

2. Sites

2.1 Table 1 details the sites where surveys were undertaken, the count type and the survey dates. Figures 1 and 2 show the site locations for the east and west areas respectively. A detailed map for each survey site can be found in Appendix 1.

| Table 1 - Site Locations and Survey Schedule | | | | Dates | | |
|--|------|------------|--|--------|--------|--------|

3 Link and Turn Count Results

3.1 Figure 3 shows the number of adults and children using the footpaths, grouped by pedestrian, cyclist, horse rider and buggy/wheelchair users.

3.2 The majority of people using the footpaths were adult pedestrians, followed by adult cyclists. Although there were far more adults than children, the number of children counted were equally split between pedestrians and cyclists.

3.3 Table 2 presents the data for the link and turns counts in the east area.

| Table 2 East Link and Turn Count Results | | | | | | | | | | | |

| % | | 48% | 10% | 30% | 9% | 0% | 0% | 0% | 3% | 100% | |

3.4 Key observations for the eastern end (sites 1-10) are as follows:

- A total of 1544 people were counted.
 - Site 4 was the busiest site, with almost half of the people counted here.
 - Sites 6, 7 and 9 were the least used, with 5, 5 and 0 people counted respectively.
 - Of the link counts, 50% were adult pedestrians and 26% were adult cyclists.
 - Site 4 was particularly popular for cyclists, with 342 adult and child cyclists out of a total of 455 surveyed across all the eastern sites.
 - Site 8 had 3 times as many cyclists as pedestrians.
 - 2 horse riders were counted, 0.1% of the total footpath traffic.
 - Children in buggys made up 4% of the people counted.
 - 2 wheelchair users were counted in the east area.
-

3.3 Table 3 presents the data for the link and turns counts in the west area.

| Table 3 West Link and Turn Count Results | | | | | | | | | | | |

| % | | 52% | 6% | 36% | 4% | 0% | 0% | 0% | 1% | 100% | |

3.4 Key observations for the western end (sites 11-16) are as follows:

- A total of 1179 people were counted.
- The busiest link count was at site 13B, where a third of people were counted.
- Site 14 was the busiest turn count, with 259 people (22%) using this junction.
- Fewer than 2% of people counted were at sites 12 and 13A (10 people and 12 people respectively).
- At the link count sites, there was a fairly even split between pedestrians and cyclists, with 50% of people walking and 48% cycling.
- The turn count sites had more than 4 times as many pedestrians as cyclists.
- The majority of cyclists (82%) were passing through sites 13B and 16 (265 and 122 cyclists respectively).
- 5 horse riders and 3 wheelchair users were counted.
- Only 16 children in buggys were counted, compared with 51 at the eastern end.

4 Interview Results

4.1 757 interviews were carried out at the eastern end and 1265 at the western end.

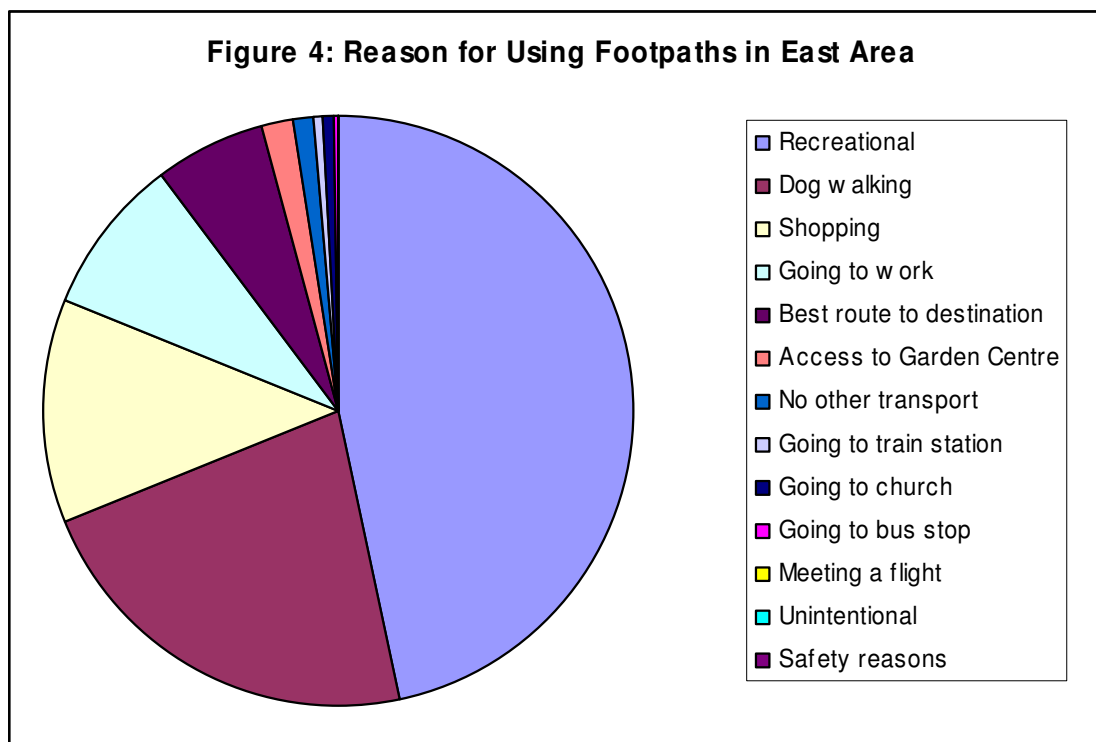

Of those conducted in the east, three quarters were with individuals and a quarter with a member of a group. The majority of interviews (61%) were during the daytime (10:00-17:00), with 16% early (07:00-10:00) and 23% during the evening (17:00-21:00). 16% of people on the footpaths at the eastern end were not interviewed because they were either children, missed or avoided by the surveyor. 14% of people asked refused to answer.

At the western end, 77% of interviews were held with individuals and the remainder with someone travelling in a group. The proportion of interviews carried out across the day is similar to the eastern end, with 20% early, 56% during the daytime and 24% in the evening. 23% were not interviewed as they were either children, avoided by the surveyor or were missed. A total of 18% refused the survey when asked.

Tables showing these results in detail can be found in Appendix 2. Interview responses are listed in full in Appendix 3.

4.2 Table 4 and Figure 4 show the reasons given by interviewees for using the footpaths at the eastern end.

| Table 4 Reason for Using Path in East Area | Site | | | | | | | | | | Total | % |
|--|-----------|-----------|-----------|------------|-----------|----------|-----------|----------|-----------|------------|-------------|---|
| | 1 | 2 | 3 | 4 | 5 | 7 | 8 | 9 | 10 | | | |
| Recreational | 22 | 23 | 25 | 142 | 8 | 3 | 9 | 2 | 7 | 241 | 47% | |
| Dog walking | 7 | 12 | 44 | 20 | 3 | 4 | 5 | | 20 | 115 | 22% | |
| Shopping | 5 | 1 | 1 | 55 | 1 | | | | | 63 | 12% | |
| Going to work | 6 | 2 | 1 | 35 | 1 | | | | | 45 | 9% | |
| Best route to destination | 13 | 2 | 4 | 12 | 1 | | | | | 32 | 6% | |
| Access to Garden Centre | | | | 7 | 1 | | | | | 8 | 2% | |
| No other transport | | 1 | | 4 | 1 | | | | | 6 | 1% | |
| Going to train station | | | | 3 | | | | | | 3 | 1% | |
| Going to church | 1 | | | 1 | | | | | | 2 | 0% | |
| Going to bus stop | | | | 2 | | | | | | 2 | 0% | |
| Total | 54 | 41 | 75 | 281 | 16 | 7 | 14 | 2 | 27 | 517 | 100% | |

4.3 Key findings are as follows:

- 47% of people interviewed were using the footpaths for recreational purposes. Other popular responses included dog walking (22%) and shopping (12%).
- Site 1 appears to be a particularly convenient route. 24% of interviewees were using the footpath because it was the best route to their destination, compared with an average of 6% for this reason across the 10 eastern sites.
- Sites 3 and 10 are popular areas for dog walking, with 59% and 74% of people using the footpath for this reason.

4.4 Table 5 and Figure 5 show the reasons given by interviewees for using the footpaths at the western end.

| Table 5 Reason for Using Path in West Area | Site | | | | | | | Total | % |
|--|-----------|----------|----------|------------|------------|-----------|------------|------------|-------------|
| | 11 | 12 | 13A | 13B | 14 | 15 | 16 | | |
| Going to work | | | | 13 | 47 | 17 | 143 | 220 | 30% |
| Best route to destination | 2 | 1 | | 17 | 42 | 26 | 122 | 210 | 29% |
| Recreational | 10 | 6 | 6 | 98 | 19 | 24 | 34 | 197 | 27% |
| Dog walking | 31 | 2 | 2 | 12 | 31 | | 4 | 82 | 11% |
| Shopping | | | | 2 | 1 | | 2 | 5 | 1% |
| Going to train station | | | | | 1 | | 3 | 4 | 1% |
| Meeting a flight | | | | | | | 3 | 3 | 0% |
| No other transport | | | | 2 | | | | 2 | 0% |
| Going to bus stop | | | | 1 | | | | 1 | 0% |
| Unintentional | | | | | | | 1 | 1 | 0% |
| Safety reasons | | | | | | | 1 | 1 | 0% |
| Total | 43 | 9 | 8 | 145 | 141 | 67 | 313 | 726 | 100% |

4.5 Key findings are as follows:

- The 3 main reasons for using the footpaths to the west were going to work (30%), the best route to destination (29%) and recreational use (27%).
- Other than 11% dog walking in the area, very few people used the footpath for any other reasons.
- Nearly 46% of people interviewed at site 16 used the footpath to get to work and 40% because it was the best route to their destination, showing a heavy emphasis on using this footpath for purpose rather than leisure.

4.6 Figure 6 gives an indication of how often interviewees use the footpaths both at the eastern and the western ends.

4.7 From comparing the frequency of use in the east and west areas, it is notable that those using the footpaths in the west rely on them on a more regular basis than those in the east. However, for both areas, the vast majority of interviewees use the footpaths at least weekly.

4.8 Table 6 shows the frequency of use of the footpaths in the east area.

| Table 6 Frequency of Use in the East Area | Site | | | | | | | | | Total | % |
|---|-----------|-----------|-----------|------------|-----------|----------|-----------|----------|-----------|------------|-------------|
| | 1 | 2 | 3 | 4 | 5 | 7 | 8 | 9 | 10 | | |
| More than 3 times a day | 1 | | | 1 | 2 | | | | | 4 | 1% |
| 2-3 times a day | 8 | 2 | 6 | 3 | | 2 | | 1 | 2 | 24 | 5% |
| Daily | 8 | 8 | 30 | 42 | | 1 | 4 | | 8 | 101 | 20% |
| 5-6 times a week | 3 | 2 | 6 | 12 | | | | | 1 | 24 | 5% |

| Never | 2 | | 1 | 1 | | | | | | 4 | 1% |
| First time | 3 | 4 | 5 | 7 | 1 | 1 | 1 | 1 | 1 | 24 | 5% |
| Don't know | | | | | 1 | | | | | 1 | 0% |
| Total | 53 | 41 | 75 | 282 | 14 | 7 | 15 | 3 | 27 | 517 | 100% |

4.9 Key findings are as follows:

- 20% of people interviewed use the footpaths daily.
- Three quarters of interviewees use the footpaths at least once a week.

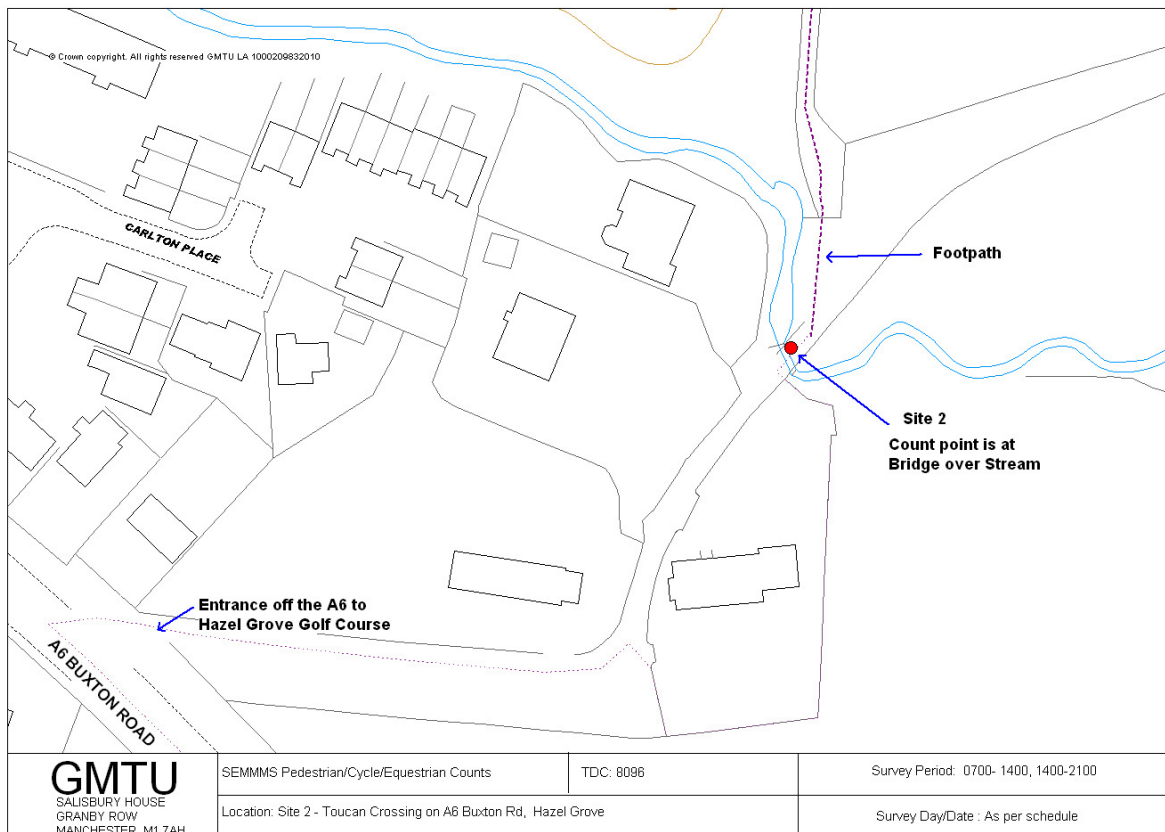

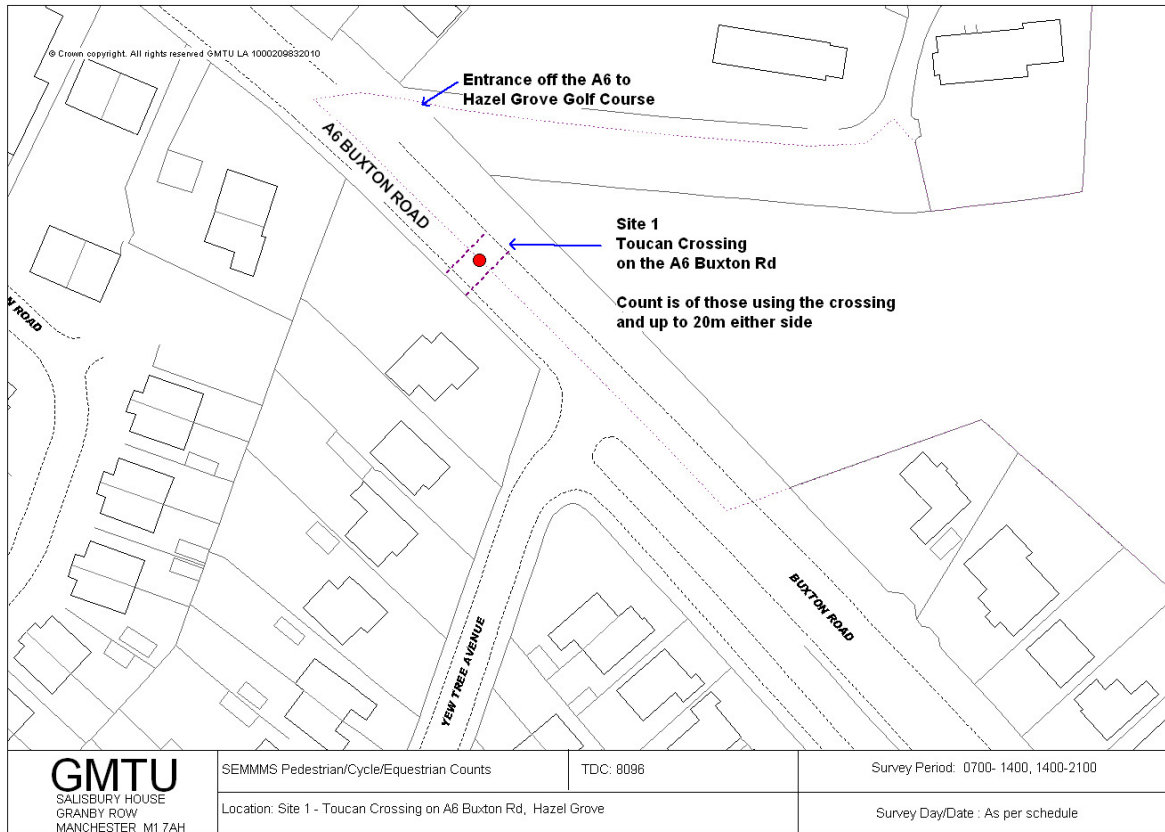

4.10 Table 7 shows how often interviewees use the footpaths in the west area.

| Table 7 Frequency of Use in the West Area | Site | | | | | | | Total | % |
|---|-----------|----------|----------|------------|------------|-----------|------------|------------|-------------|
| | 11 | 12 | 13A | 13B | 14 | 15 | 16 | | |
